OVERVIEW

PRESENTER

One of the revised hallmarks of cancer is dysregulated energy metabolism. This session will cover the historical and modern concepts of glucose utilization and energy generation in cancer, how it may affect tumor cell behavior, and strategies for intervention.

Learning Objectives:

- Compare the historical and modern concepts in cancer of glucose utilization and energy generation.
- Discuss how glucose utilization and energy generation affects tumor cell behavior.
- Identify strategies for intervention in cancer bioenergetics.

COURSE CONTENT

To watch the lecture: Click on the link below to launch the online course. From there you can view the lecture and download a PDF of the slides if you would like to retain them for your records.

To unlock the CE certificate and complete the course, you will first view the lecture, pass the quiz and complete the post course feedback.

 Cancer Bioenergetics Lecture

 Quiz

Per RACE standards, this quiz must be passed with a score of 70% or higher.

Not available unless: The activity **Cancer Bioenergetics Lecture** is marked complete

COURSE INFORMATION

Curriculum Set:	Science of Veterinary Oncology
Series:	2 of 13 courses
Duration:	60 minutes
Course Release Date:	September 2019
Course Format:	Online Learning

 Target Audience:	ACVIM Diplomates & candidates
 Course Level:	Foundational
 Specialty:	Oncology
 RACE CE Hours:	1.0

10. After completing the lecture, click “Finish” and you will be redirected back to the main page of for this topic.

Complete Course

To Complete the Course

Click the button to the right. This will log your completion and unlock your certificate back at the course page.

11. Once back on the main page, you may access the course references and take the quiz and complete the course feedback. A passing score (70% or better) will unlock the CE certificate.
12. Once completed, you may either exit out of the program or return to step 4 above to search for other courses.
