The ACVIM Board of Regents recognizes the need to foster the professional development of veterinary clinician-scientists who will advance animal health in the internal medicine disciplines. To this end, the ACVIM Board of Regents will support up to four $25,000 fellowships in clinical, translational or basic science research to support ACVIM Diplomates or ACVIM Candidates that have completed residency-training programs within the last 2 years who wish to pursue an advanced training program for a minimum of 1 year. Fellowship will provide salary support for training opportunities for fellows committed to a career in veterinary research. The following are the essential elements of these training programs:

1. Academic or private institutions with an active research program related to the focus of the fellowship are eligible to apply. The primary supervisor/mentor (Program Director) must have a proven track record of funding in the proposed research area and a documented history of exceptional mentoring of research trainees.

2. All applications must address an issue(s) relevant to an ACVIM specialty. Applicants are expected to fully justify the relevance of the proposed projects/training to the mission of ACVIM and the advancement of an ACVIM discipline.

3. Applications are limited to one per institution.

4. Funding will be provided by ACVIM Board of Regents ($25,000) and the academic institutional partner, who will provide – at the minimum of $25,000 matching funds in direct support of the program for the first year.

5. If institutions wish to implement a 2- or more year fellowship program, they are responsible for providing full salary for the additional year(s). Note that institutional support may be sourced from a third party, e.g. industry partner. One or more letters of financial commitment must accompany the application.

6. The institutional partner must verify that this ACVIM partnership will indeed increase the number of fellows being trained at their institution (i.e., funds will not be used to replace existing remuneration to fellows/ for fellowships).

7. Applications will be reviewed by members of the ACVIM Education and Research Committee and will be evaluated on the strength of the proposed program, track record of the mentoring team, potential impact of the fellowship on advancement of the specialty, and opportunities for post-fellowship career paths.

8. Applicants that have not submitted interim and/or final reports from previous ACVIM-funded fellowship, resident or research awards are not eligible to apply until completion of these program requirements.

9. Applicant institutions are responsible for selection of the research fellow. The ACVIM reserves the right to withhold funding if the selected individual does not meet the selection criteria.

10. All research activities in the program must ascribe to the ACVIM policy on animal use.

11. Funded candidates for research programs must have a plan to complete specific training in clinical, translational or basic science research methods. This requirement may be satisfied by local graduate courses, NIH Clinical Research Training On-Line Course for Principal Investigators (http://cc.nih.gov/training/training/crt.html) or other comparable mechanisms.

12. Acknowledgements of funding from the ACVIM through the ACVIM Fellowship program must be stated on publications and presentations related to the fellowship program (for example: Dr. Smith’s Fellowship in XXXX was funded in part by an award from the ACVIM Board of Regents).

13. Interim (6 month) and final reports (within 3 months of completion of the fellowship) are required. In accordance with the ACVIM granting guidelines, all grant recipients are required to submit a final summary report within 3 months of the last funded date at the completion of the fellowship. Failure to submit a final summary report on time may result in the principal investigator becoming ineligible for funding from future ACVIM funding. See attached interim and final report guidelines.
14. Application/funding cycle – the deadline for receipt of applications is **October 15, 2020 at 11:59 pm Mountain Time.** Successful applicants will be notified within one month of the submission deadline. Funds will typically be disbursed during the second or third quarter of the year, depending on the timing of the start of the fellowship.

**PROPOSAL GUIDELINES:**
The following information must be included as part of the application, in the order outlined. It should be **single-spaced;** Times New Roman, **11 pt. type,** with **1-inch margins** and **bold section titles.** Proposals not following this format will be returned.

1. **Eligibility** The applying institution must have an active research program in a discipline related to the fellowship and relevant to an ACVIM specialty discipline. Supplemental funding must be available from the institution or other sources. The institution should select the fellowship candidate by advertisement through normal channels either in advance of funding availability or once funding has been released.

2. **Title Page**
   a. Name of Institution.
   b. Mailing address of Institution (street, city, zip code, country).
   c. Name of proposed Fellowship Program (“Fellowship in….”).
   d. Proposed Fellowship Program Director and their contact details (phone, fax, mail).
   e. Research focus and ACVIM Specialty of Program Director, if applicable (SAIM, LAIM, cardiology, neurology, oncology).
   f. List the individuals that will directly support the fellowship trainee. This should include their current position title and email contact.

3. **Program Description** (4-page limit). Detailed outline of the proposed fellowship program including:
   a. Nature of the proposed research. Describe the scholarly component of the fellowship-training program.
      i. If a single research project, this should include where the research will primarily be conducted, whether research will be laboratory-based, translational or clinical, and who will be the primary supervisor of the research. Please provide a 2-page outline of the proposed research project, including the research background, hypothesis, specific aims, experimental approach, materials and methods, expected outcomes, and budget.
      ii. OR, if the goal of the fellowship is primarily in research methods and the fellow will provide significant work on multiple ongoing research efforts, please provide detailed description of the goals, outcomes and deliverables which will be used to demonstrate successful fellowship progress.
   b. Relevance of the proposed basic, translational or clinical research to an ACVIM specialty and/or the practice of veterinary clinical medicine. How does this research address the ACVIM mission statement?
   c. Time allocated to research—a minimum of 80% of the fellow’s time must be dedicated to research training.
   d. The number of weeks dedicated to clinical receiving, anticipated clinical caseload and duties during those weeks (maximum allowable 6 weeks).
   e. Time allocated for self-directed study or vacation.
   f. List the training sites throughout the fellowship year (including offsite locations).

4. **Please document that adequate funding is available for the proposed research project(s)** Please state the amount available and the funding source(s). (500 word-limit)

5. **References cited** (3-page limit)

6. **Plan for dissemination of results** (1-page limit)
   a. Please describe how the results of this research will be communicated to the ACVIM membership, practicing veterinarians, and other stakeholders.
7. **Animal use justification** (no page limit)
   a. For studies involving animals please include species, number of animals and USDA pain category for proposed procedures ([https://www.nal.usda.gov/awic/reducing-pain-and-distress](https://www.nal.usda.gov/awic/reducing-pain-and-distress)).
   b. Power calculation to indicate sufficient numbers of animals included/justify animal numbers.
   c. Describe how pain and/or distress will be controlled.
   d. For non-client owned animals, please indicate what will happen to animals at the completion of the study.
   e. Include a copy of client consent form if client animals proposed.
   f. Please include status of **institution animal care and use committee** (IACUC) approval at institutions where animal care and use committees govern animal use. If the applicant institution **does not have an IACUC**, please provide the following documentation:
      i. Provide a complete and accurate description of what procedures will be performed on/with the animals, including:
         1. Describe all procedures, their frequency and time points over the course of the experiments.
         2. Include how long the animals will be maintained. Include dose, route of administration and frequency of any drugs to be administered.
         3. Describe methods used in behavior studies (including use of noxious stimuli or other methods of positive or negative reinforcement).
         4. Please provide details of any surgical procedure, including anesthetic protocol and pain management.
         5. How are the numbers of animals justified? Include statistical power calculations if applicable.
         6. What are the potential study-induced or related problems the animals might experience (i.e. health problems, pain, distress, complications, etc.)
         7. How will pain/distress be monitored? Please provide specific clinical signs, frequency of monitoring and how animals will be monitored off hours.
         8. Explain what steps will be taken to alleviate pain and discomfort. Include drug, dose, route, and frequency.
         9. Please describe criteria for removing animals from the study protocol (i.e. at what point do pain/distress warrant removal form the experiment?)
   g. All research activities in the program must ascribe to the ACVIM policy on animal use (see below).
   h. **Grant funds will not be released until adequate institution animal care and use committee (IACUC) documentation or the documentation that an IACUC approval is not required is received by the ACVIM office.** Applicants are strongly encouraged to begin the IACUC application process when proposal are submitted.

8. **Proposed mentoring/training in research methods and professional development** (1-page limit)
   a. Include planned training in ethical use of animals in research; specific training in grant writing, or other planned professional development activities planned for fellow.
   b. Describe the nature and frequency of supervision and mentoring that will occur during the proposed award period. If more than one mentor is proposed, the respective areas of expertise and responsibility of each should be described. Co-mentors should describe clearly how they would coordinate the mentoring of the fellow.
   c. Mentoring plans should address:
      i. WHAT aspects of development would be targeted? For example, study design, manuscript preparation, patient management, ethical care of animals, scientific manuscripts.
      ii. WHO will be responsible for each section or aspect of the mentees development?
      iii. HOW (for example, time in the lab, visiting scholar, working with a statistician)?
      iv. WHEN (in the set-up of the study, during regular meetings as the study progresses, after each case, times for manuscript writing and review)?
v. WHERE (with the statistician, with a collaborating scientist, with the primary mentor)?
vi. Include estimated date for project completion in relation to expected date of fellowship completion.

9. Potential impact of the fellowship on advancement of the specialty, and opportunities for post-fellowship career paths for the fellow
   a. Provide a brief statement (< 500 words) as to how completion of this fellowship program is likely to alter the candidate’s career path, including potential opportunities for employment after program completion.

10. Criteria the institution will use for selection of the fellow (1-page limit).
    a. ACVIM Board of Regents requires that the research fellow must be board-certified in the ACVIM, or must have completed an ACVIM residency-training program within the 2 years preceding the starting date of the fellowship.
    b. List any additional prerequisites required by your institution for selection of candidates for the fellowship program
    c. Describe the selection process for candidates. Criteria should be stringent enough to ensure that the candidate possesses the capacity to complete the program.
    d. Has a candidate already been identified through advertisement of the fellowship? If so, include a description of the selection process used for your chosen candidate. Attach a copy of the advertisement (that includes the date of the advertisement) and the candidate’s curriculum vitae.

11. Qualifications of the Program Director, supervising Diplomates and proposed research mentor(s) (1-page limit for each Program Director/Diplomate/research mentor)
    a. Include a brief (< 500 word) personal statement specifically as it relates to their role in this fellowship training process
    b. Include the mentor’s history of training students in research including graduate and post-doctoral students, fellows and other trainees.
    c. Include information from previous research trainees including name, dates of training, subsequent position(s).

12. Biographical sketches for Program Director, supervising Diplomate(s) and other research mentor(s) (3-page limit for each investigator)
    a. Use NIH format (https://grants.nih.gov/grants/forms/biosketch.htm)
    b. Include education/training (location, dates and degree(s) awarded positions held/honors, professional memberships, grants received that will contribute to the research outlined in the fellowship training proposal, and selected peer-reviewed publications over the last 5 years (if relevant).

13. Institutional letter of commitment
    a. Please attach one or more letters of commitment for the fellowship program from the institution and any other funding source(s) identified.
    b. Letters should include the amount of money committed, the date that money will be made available, and any additional stipulations from the funding source(s).
    c. Institutional letter of support should include assurances that ACVIM fellowship support is providing a new position at the institution (i.e. ACVIM support is not being used in lieu of institutional dollars to support an existing position).
    d. Submitted letters should be on institution letterhead.

14. Budget
    a. ACVIM funds should be used to support salary and employment benefits for the fellow. ACVIM funds cannot be used for other salary support, travel, equipment or research or funding or clinical patient care. Travel for presentation at the ACVIM forum or other meeting should not be included. See budget template below.
    b. Travel awards: An additional $500 of travel support for presentation of the scholarly outcomes of this fellowship at the ACVIM Forum may be awarded during the term of the grant if requested and funds are available. For international residents, additional travel funds may be available on request. Please see travel award request for proposals.

15. Has this fellowship been administered previously? If so, state sources of funding and list the names of the trainee(s) in the past and the dates of fellowship completion.
SUBMISSION OF PROPOSALS
Proposals should be submitted electronically by 11:59 pm Mountain Time October 15, 2020. The Education and Research Committee will review all proposals. Please contact the ACVIM Office with questions regarding this application at Research@ACVIM.org or by phone at 800.345.9081 or 303.231.9933.

SELECTION CRITERIA
Members of the ACVIM Education and Research Committee will score proposals based on the rigor of the scholarship/clinical research component (10 points), qualifications of individuals in support of the program (10 points), proposed training in research and professional development (10 points), candidate selection process of the institution (5 points), potential impact of the fellowship and the proposed scholarship on advancement of the specialty/subspecialty (5 points) and opportunities for post-fellowship career paths (5 points).

Proposals must score a minimum of 5/10 or 3/5 in each category to receive funding.

Unfunded programs will receive feedback from the review committee as to how their proposals could be improved for the future.

ACVIM Policy for the Humane Treatment of Animals
The American College of Veterinary Internal Medicine believes that the use of animals in research is a privilege that carries with it professional, scientific, ethical and moral obligations. The ACVIM endorses the principles embodied in the "3 Rs" tenet of Russell and Burch (1959). These principles are: replacement of animals with non-animal methods wherever feasible; reduction of the number of animals consistent with sound experimental design; and refinement of experimental methods to eliminate or reduce animal pain and distress.

Based on these principles and beliefs, the ACVIM requires that all proposals have the approval of the appropriate regulatory group (ie: IACUC, Animal Ethics Committee) and report this approval to the Foundation prior to the release of funding. Every animal shall have compassionate care, comfort and protection from abuse and unnecessary pain and distress. Investigators shall also minimize stress and fear in animals. The ACVIM shall not fund health studies that require euthanasia as the study endpoint. The ACVIM considers euthanasia acceptable, with informed consent of the owner or responsible agent, if the disease or condition being studied or an unanticipated illness or injury results in pain and suffering in the animal which cannot be alleviated with standard methods. The ACVIM requires informed owner consent in all clinical/research trials. An informed owner consent form of acceptable standards must be approved by the ACVIM prior to funding.

Use of samples from biorepositories is acceptable in ACVIM-funded studies. The use of Institutional Colony Animals will be evaluated on a case-by-case basis, but at no time will ACVIM funds be used to purchase animals to be included in colonies. The ACVIM reserves the right to terminate funding of a study if progress is deemed unsatisfactory or if there are concerns about animal well being.

Projects that involve the use of recombinant DNA, viral vectors, and / or radioactivity must be approved by the Institutional Biosafety Office of the institution where the work is to be done. A copy of the Institutional Biosafety Office approval must be provided in the event funding is awarded.

If the proposed project does not require IACUC or Institutional Biosafety approval, please include a statement that indicates that the proposed project is exempt and explains why.
